

PRECISION MODULES

Designed and engineered as versatile multiple recessed luminaires, Precision Modules integrate robust and architectural styling with superior performance, freedom and control over the light source. The new modules feature independent, adjustable and aimable elements that pull down and lock-in for superlative wall washing, accent, spot and perimeter lighting.

ARCHITECTURAL ELEMENTS

Created with clean, contemporary lines and a sleek contoured profile, Architectural Elements are pendants designed with a scale and design for challenging commercial applications. Cased glass shades, accented with colored glass trim, achieve a perfect balance of color and light to illuminate large spaces. Compact fluorescent and incandescent lamping options available.

PRECISION SPOTS

For the best in track lighting where performance, fit and finish are critical, Precision Spots feature upscale track heads crafted of die cast aluminum and designed with a sophisticated, architectural look. Available for both low and line voltage track systems, these luminaires deliver high performance, precision horizontal aiming, vertical locking capabilities and concealed wiring.

FLEXRAIL2

A two-circuit, line voltage bendable rail system, Flexrail2 is well suited for commercial applications that require a multitude of fixtures and a high volume of light. Flexrail2 combines a stunning, contemporary look with a complete palette of lighting tools including nearly 200 fixtures and pendants. The two circuits can be used independently to achieve the perfect lighting solution.
